There was a question about whether the course was better as a transfer level course or a noncredit course. Faculty indicated that the course would be similar to COU 1 in some ways but focus on the students' accommodations, how they work, students' responsibilities, and how students will advocate for themselves with those accommodations. Currently this information is provided to students in individual meetings and the course would be more effective.

These two courses would allow for the in-season and out of season training for a new beach volleyball team.
