

	Point Person or Group	Institutional Activities Underway	Ideas Discussed with the Institution during the Visit	Other IEP Resources Needed?
A.Data Integrity	Faculty Research Group VP Information Technology Dean, I 1s8 86.376 265.7m		<p>a. Lack of confidence in existing data. The college does an excellent job of reporting. They started data vetting with departments. There is increasing confidence of accurate reporting in some areas, i.e. 320 apportionment data at categorical headcounts. The challenge is about trust in the decisions made based on more than perfect numbers. The college has made progress regarding institutional planning without all the details. How to measure success. Now the focus is on metrics and the college culture is changing faster than the data support technology can keep up with.</p> <p>b. Need to clean existing data. Building a data dictionary will create a shared understanding across the college of each data element. This is necessary for those who develop the data warehouse and supporting tables. The college needs the staff resources and knowledge to implement this tool without dragging every stakeholder into the process. Clean data does not fix the biggest issue of deciding what numbers to look at to support big decisions.</p> <p>c.</p> <p>and responsibilities of: operational reporting, planning, institutional research, and decision support.</p>	x Return meeting
B.Data Dictionary	VP Information Technology Dean, IPE	1. Initial Planning to create dictionary 2.	<p>a. Lack of consistent use of definitions slowing progress of data warehouse development. The EDW team needs to make a short list of preferred data elements with operational definitions and sources defined. Submit those for quick approval then implement.</p> <p>b. Stakeholders can refine over time.</p>	x Return meeting
