

College Planning Council Highlights

The College Planning Council (CPC) held a meeting on Wednesday, April 5, 2017 at 3:00 p.m. in E-112 and during the meeting, the following occurred:

Request for Priority Registration for Dual Enrollment (AB288) The Council received a request for priority registration for the dual enrollment (AB288) program. The college has applied for grant funds to support the dual enrollment program and grant application mandates require priority registration. The priority would be for students enrolled in dual enrollment courses offered at local high schools under AB288; students would transition to their eligible registration date once they leave the program. The request is for priority group #2, would be effective fall 2017, and would not impact other students because the dual enrollment program is for a selective group of high school students only. The vice president of student affairs, the student affairs leadership team, and the Student Affairs Governance Council have approved the request. The CPC will consider approval at its next meeting.

Update on New or Additional Space Requests At a recent meeting, the Council discussed new or additional space requests recommended by the Council and forwarded to the superintendent/president for his consideration of approval. Since the inception of the process (February 2015) several requests have come forward and many of those were approved by the superintendent/president. The administration continues to review space nee
